OBJECTIVE

I am an AI & DS student with a strong interest in technology, seeking an internship opportunity to apply analytical thinking, programming skills, and creativity to real-world projects while contributing to innovative teams through software development and technology-driven solutions for environmental and business growth.

EXPERIENCE

- Intern — Litz Technologies

May 2025

 - Built responsive web interfaces using HTML, CSS, and JavaScript across multiple internal modules, improving UI consistency and load performance.
 - Applied cloud computing fundamentals to deploy and test web components in a live server environment under senior developer guidance.
 - Collaborated in technical design discussions, contributing implementation ideas adopted into the final deployment plan.
- Intern — EDU TANTR

Dec 2025

 - Analyzed real-world datasets using Python-based data science workflows, improving data quality through structured cleaning and preprocessing.
 - Implemented analytical and problem-solving techniques across assigned tasks, delivering results within a collaborative, deadline-driven environment.
 - Strengthened data science and critical-thinking skills through hands-on training in industry-standard workflows and best practices.

PROJECTS

- AI Placement Mentor Agent

Developed an AI-powered career guidance platform that analyzes resumes, identifies skill gaps, recommends suitable job roles and companies, and generates personalized placement preparation roadmaps.

Implemented AI-driven interview preparation and career assistance using React, Spring Boot, and AI technologies to provide personalized support for students and job seekers.
- Tree Plantation & Carbon Reduction Calculator

Engineered a web-based carbon footprint calculator estimating CO2 emissions and recommending tree-planting offsets. Built an interactive dashboard with real-time calculations and data visualizations, delivering personalized sustainability insights.

Designed a responsive, user-friendly interface to promote environmental awareness and support eco-friendly decision-making.

TECHNICAL SKILLS

- Languages: Python, Java
- Developer Tools: Git, VS Code
- Frameworks: Flask, Node.js
- Database: SQL
- Soft Skills: Adaptability, Quick Learner, Leadership

EDUCATION

- B.Tech, Artificial Intelligence & Data Science

V.S.B College of Engineering Technical Campus (Affiliated with Anna University), Coimbatore.

(2023 – 2027)

CGPA: 8.10
- Higher Secondary Certificate (HSC)

Kamarajar Matriculation Higher Secondary School, Coimbatore.

(2022 – 2023)

Percentage: 75%

CERTIFICATIONS

- NPTEL — The Joy of Computing Using Python
- Infosys Springboard — Data Structures and Algorithms Using Python; Generative AI
- AWS — Foundations of Prompt Engineering
- IBM — Generative AI Essentials: Using LLMs to Work with Data

ACHIEVEMENTS

- Patent Publication — Smart Traffic Management System for Urban Congestion (Indian Patent Application No. 202541099319 A, Nov 2025)
- 1st Prize — Tech Architecture, Inter College Symposium
- Finalist — Tree Plantation & Carbon Reduction Calculator, Eclearnix Hackathon, KPR College
